## The first text box

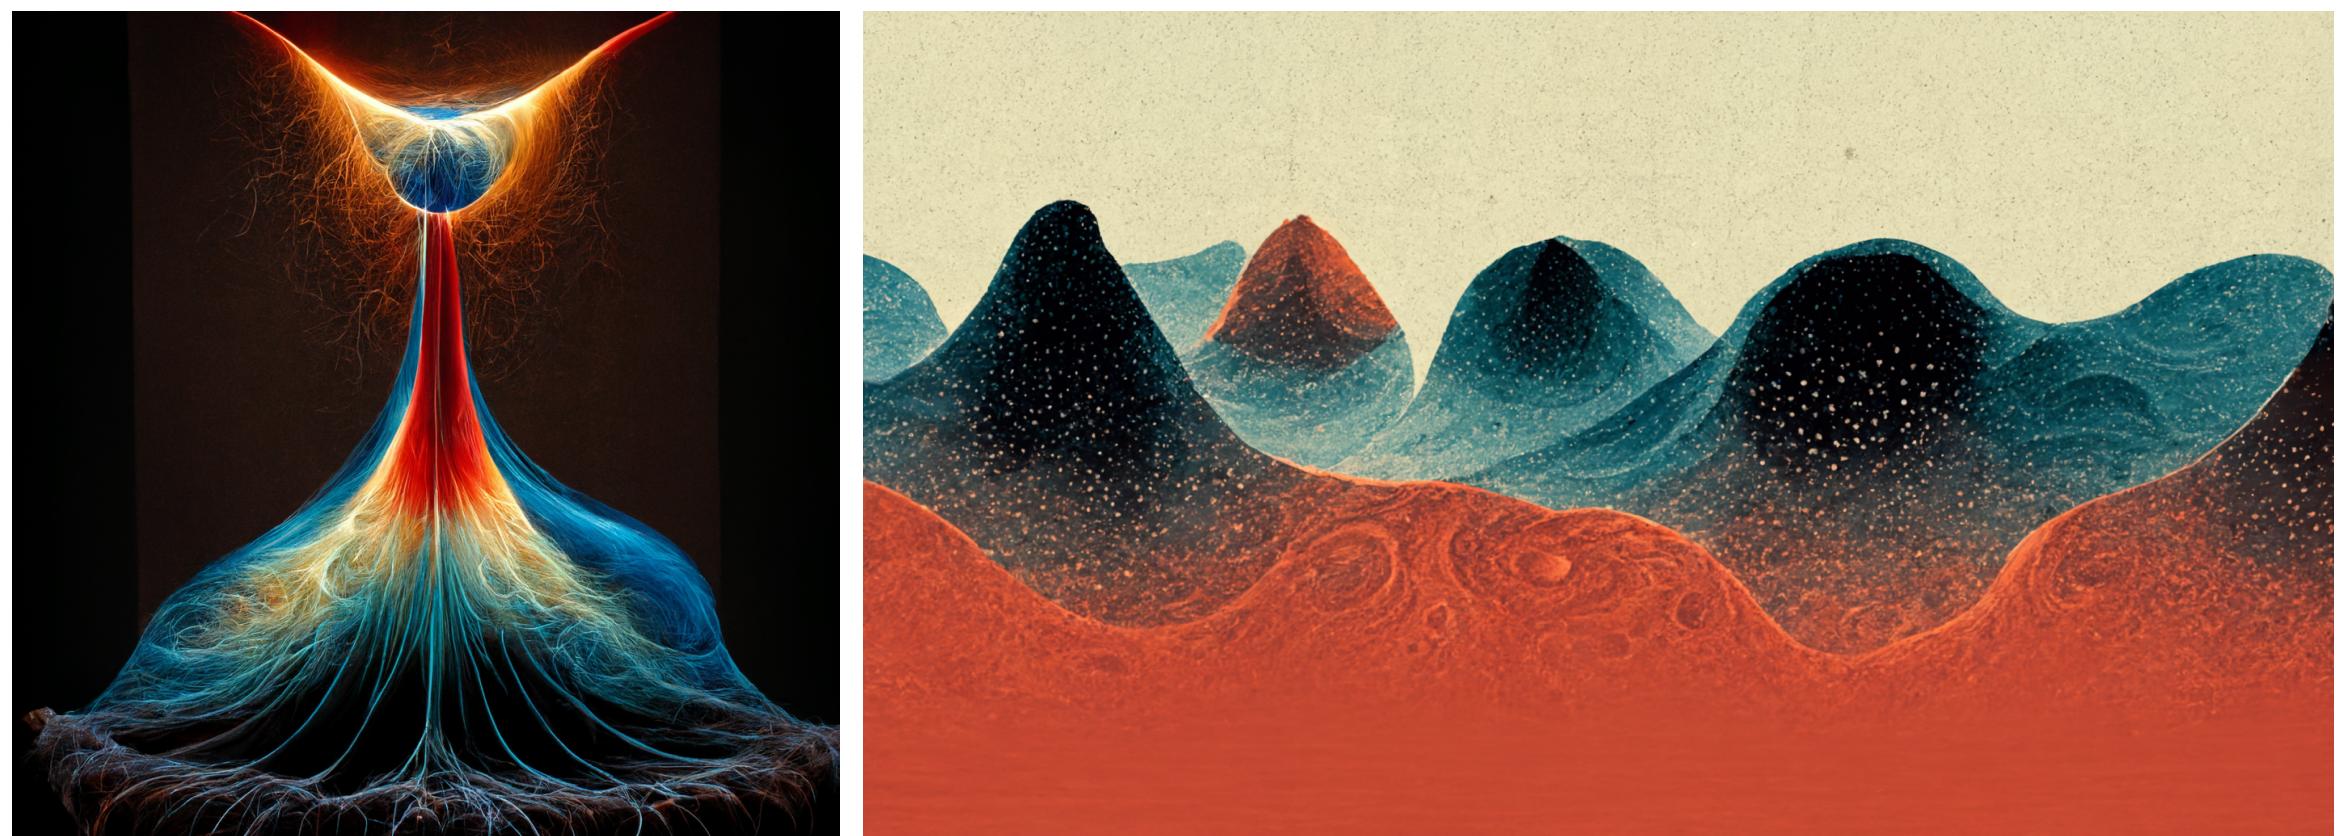

Fig. 1: The first figure caption

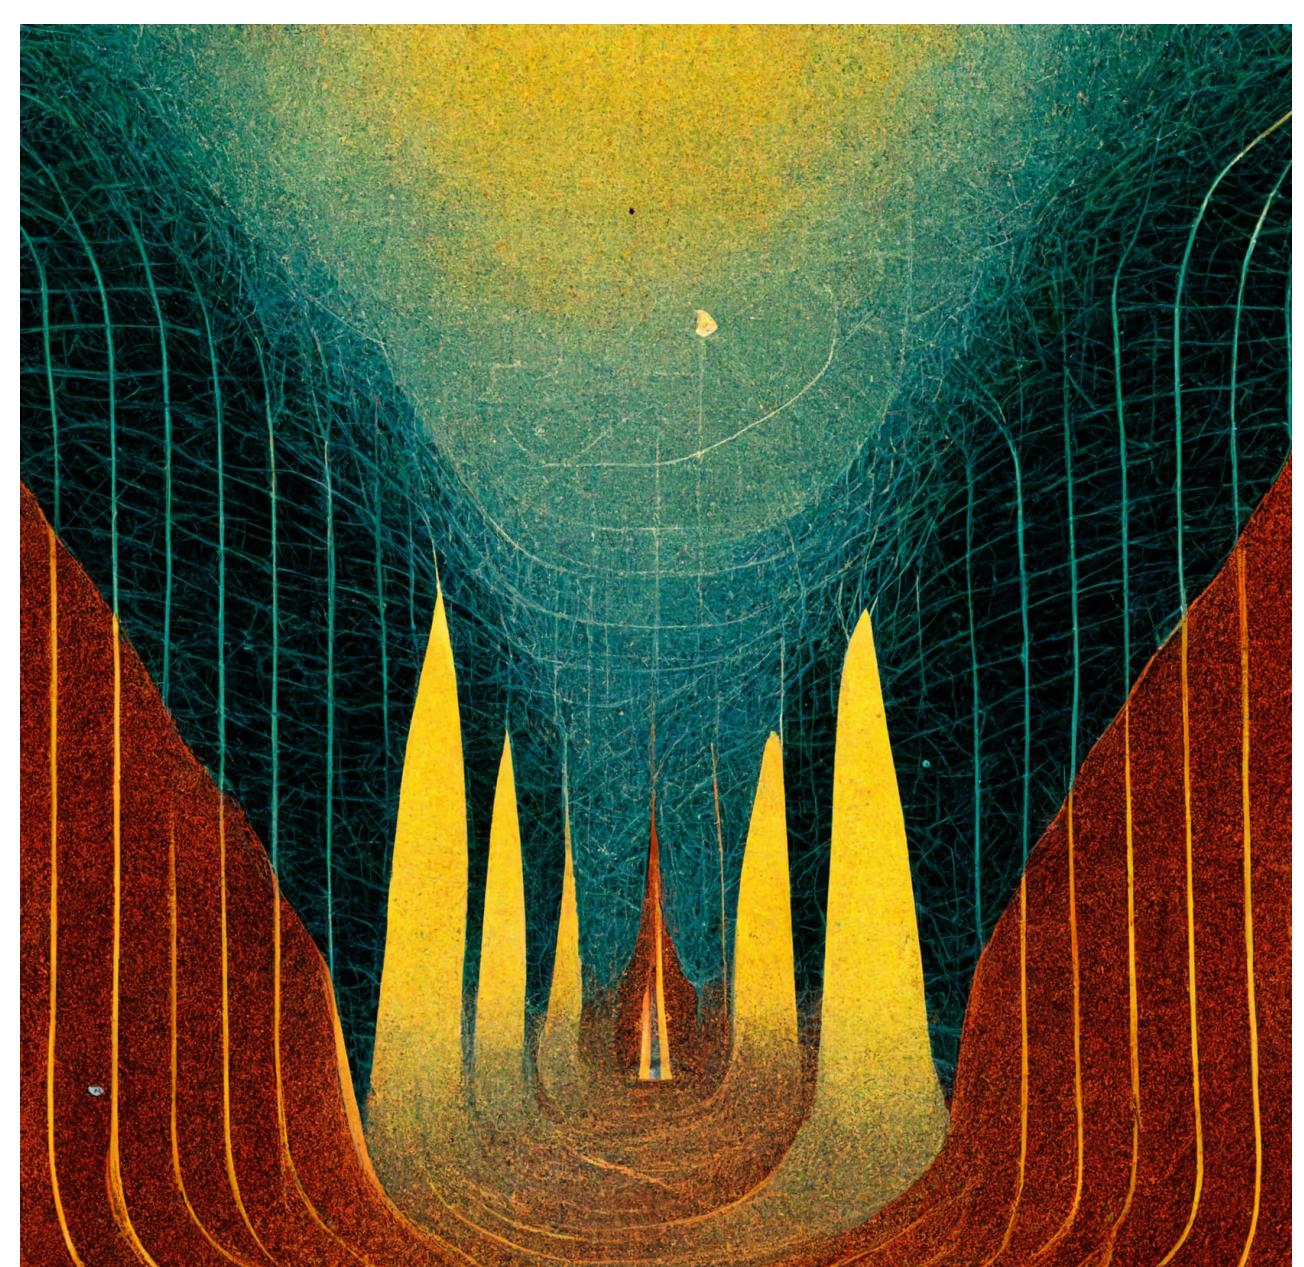

L<sup>A</sup>T<sub>E</sub>X is a high-quality typesetting system, it is excellent at mathematics, such as the equation of a circle  $x^2 + y^2 = r^2$ .

**A:** The first letter of the roman alphabet.  
**Ω:** The last letter of the greek alphabet.

Here is Bayes theorem:

$$P(A|B) = \frac{P(B|A)P(A)}{P(B)}$$

## Minipages

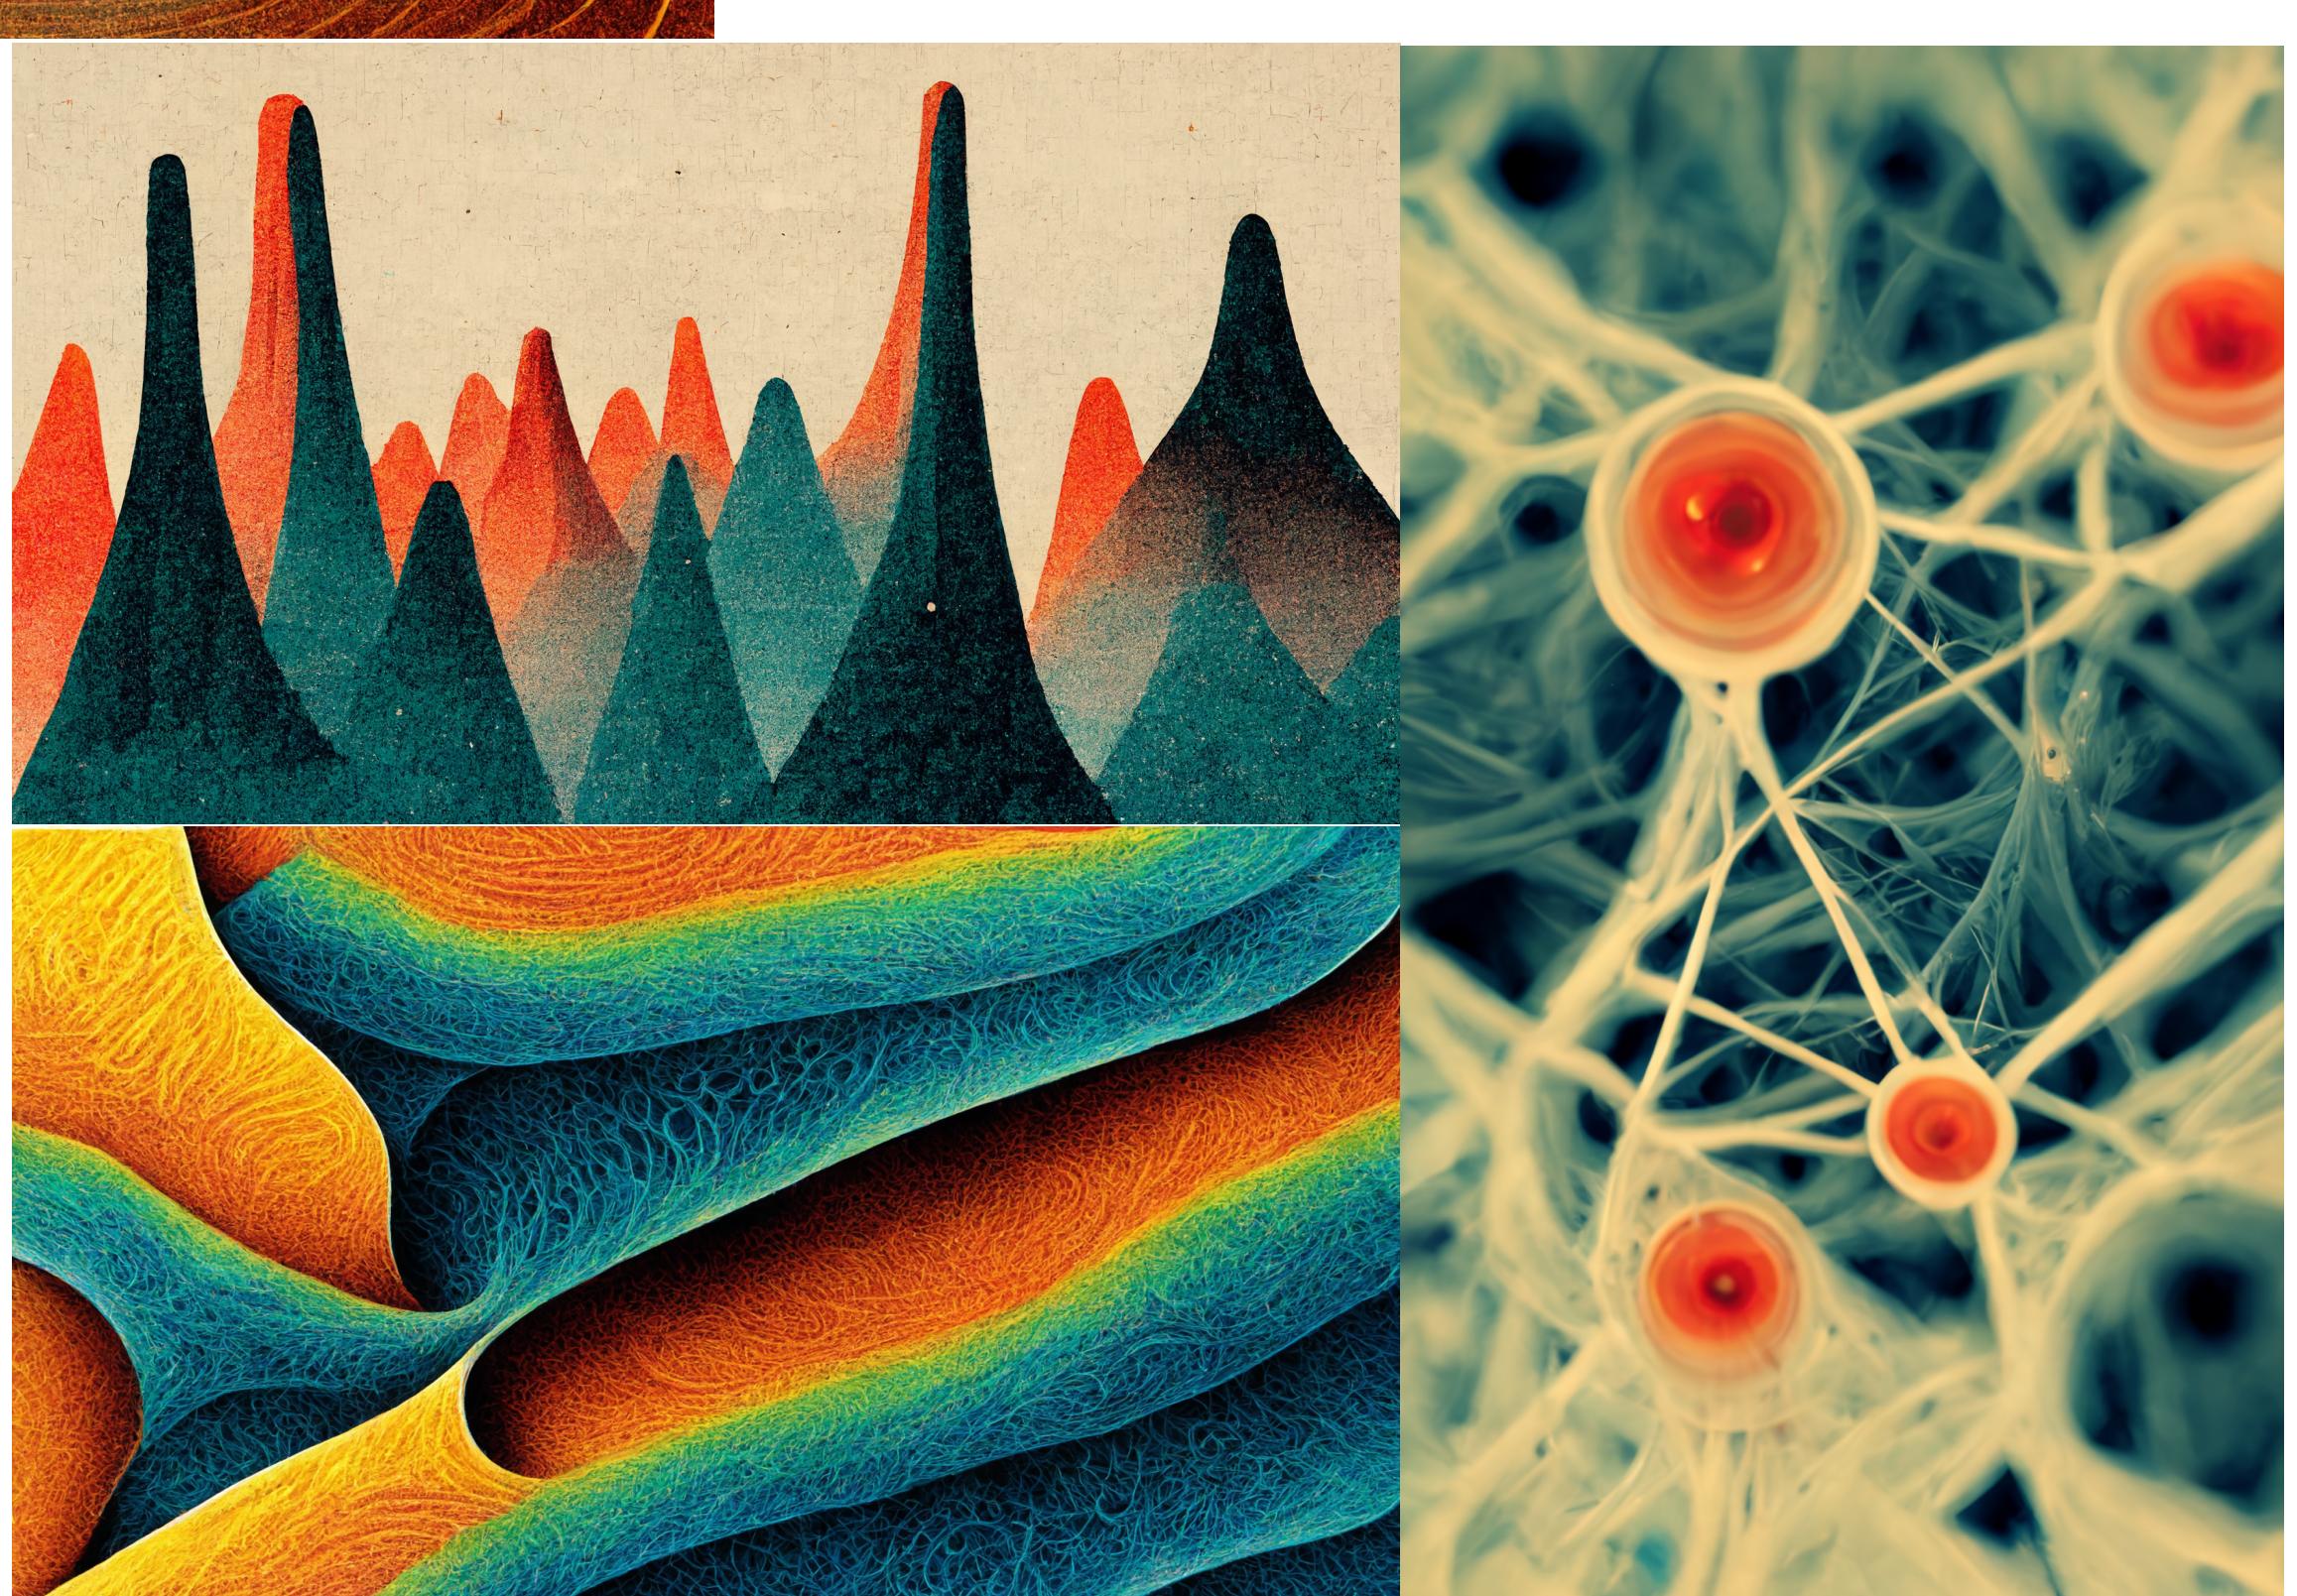

Minipages can be useful for placing figures side-by-side. They can also be used to place text side-by-side with figures. Here is an example of a minipage with a figure on the left and text on the right.

Here is Bayes theorem again

$$P(A|B) = \frac{P(B|A)P(A)}{P(B)}$$

This can be used to set up arrays of figures:

## BibTeX

As it is L<sup>A</sup>T<sub>E</sub>X, you can use BibTeX to manage your references. Here is an example of a citation [1]. You can also use BibTeX to manage the references in the bibliography. Here is a long list: [1–16]. You can see these appear in the references section.

## Printing your poster

You can print your poster same day (although don't leave it this late!) at the University Print Shop. I recommend a0, portrait, lightweight cloth (which can be gently folded in a suitcase) [www.pdn.cam.ac.uk/other-pages/avmg/posters](http://www.pdn.cam.ac.uk/other-pages/avmg/posters)
